

Mecano™ LED light bars

Mecano™ light bars are a specific solution for Mecano™ retail display units from Kesseböhmer for Wrigley. These POS displays are popular at the checkout area of grocery stores, petrol stations and convenience stores. They are thin, lightweight and come with 3M adhesion for easy installation. In contrast to ST and XD, Mecano™ light bars provide additional light on the sides as well as the front of the display. They receive power through the center of the light bar and are equipped with **end cap** attachments. Mecano light bars come in two sizes: 400mm and 600mm with 110mm end caps segments.
